

Stage 1 — the straight magnetic corridor

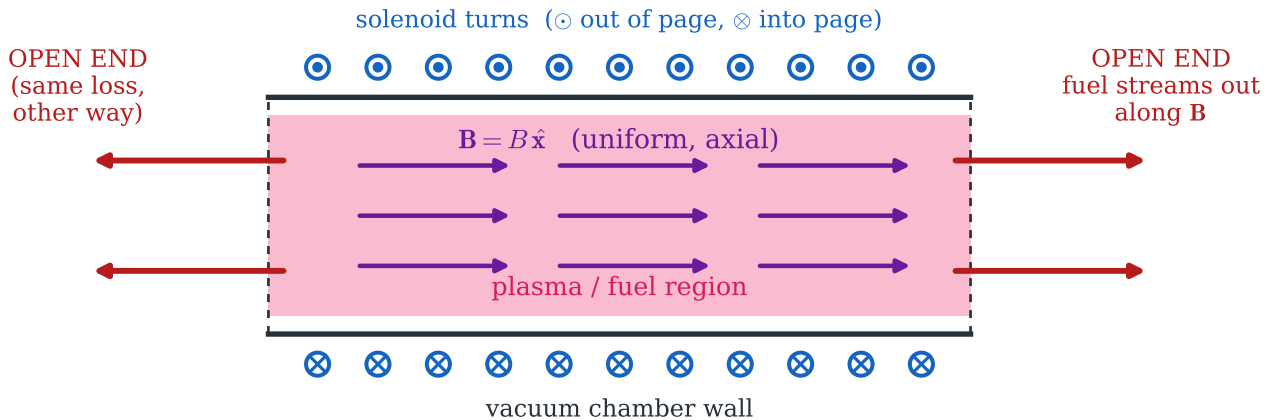

a solenoid makes $B_{\parallel}$; the ends are open, so the fuel leaves

perspective view

- | | | | |
|---|------------------------------|---|-----------------------------|
|  | vacuum vessel (chamber wall) |  | magnetic field B |
|  | plasma / fuel region |  | fuel escaping the open ends |
|  | solenoid coil turns | | |

longitudinal section

Idealized schematic; not a fabrication drawing.

$R_0/a = 3.0$, $\kappa = 1.00$, $\delta = 0.00$, 12 of 12 TF coils in the 3-D panel; all geometry computed by tokamak_build.py.
